WORLD OF THE POWER MINERS!

Deep beneath the Earth's surface, the Fearless Power Miners are on a mission to capture and contain a wild pack of rampaging lava monsters. Using awesome high-tech vehicles, they must capture the creatures to save the world!

8188 FIRE BLASTER

This speedy mining buggy may be small, but nothing's better at getting over magma rock in a hurry – or jumping over sizzling lava streams! It carries a payload of pressurized water to knock out lava monster flames, and its dynamite launcher is ready to take care of any unexpected obstacles in the way.

8190 CLAW CATCHER

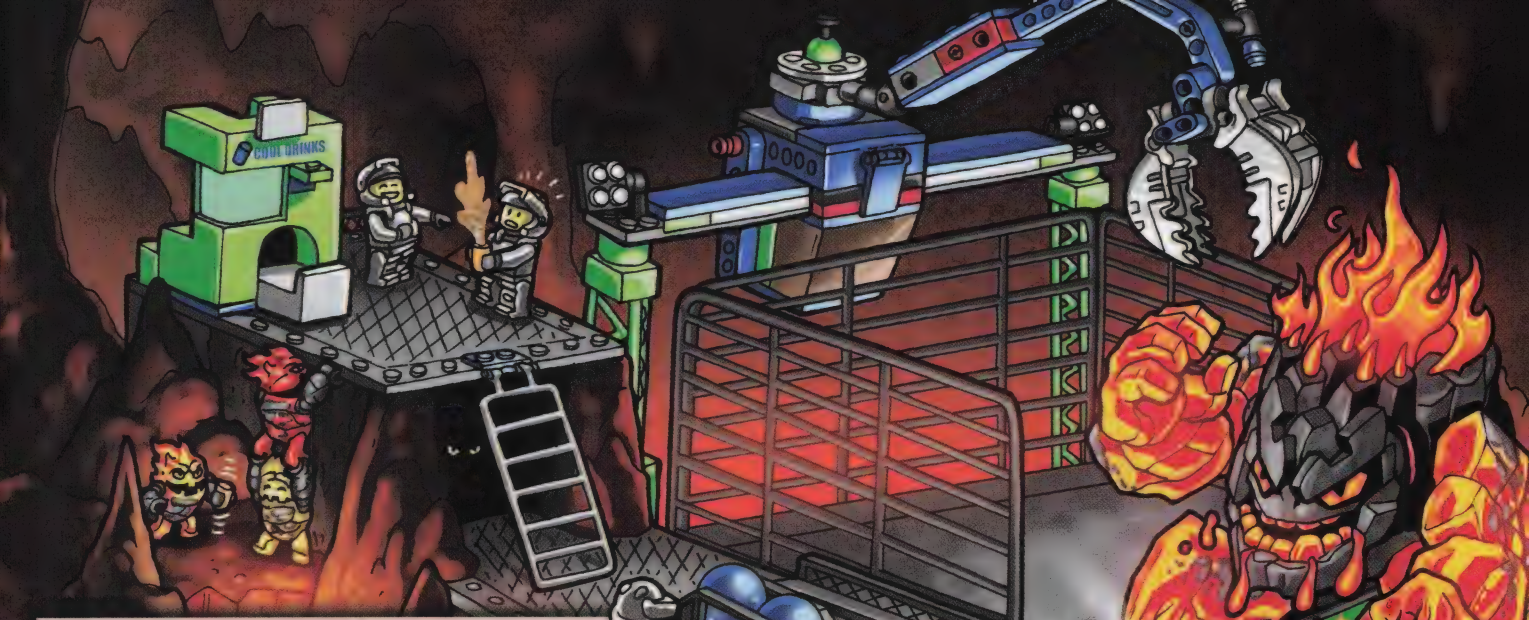

Some of those lava monsters are just too hot to handle. That's why we built the Claw Catcher. It's designed to grab monsters from a safe distance, hoist them up into the air, and automatically dunk 'em right into the big tub of super-coolant on the back. It doesn't hurt the little hotheads, but it does keep them from melting through all that armor plating during the ride back to Lavatraz!

8191 LAVATRAZ

This giant chunk of rock and green steel is our brand-new home away from home down here at the center of the Earth. It's got everything a Power Miner needs: an ice-sphere defense launcher, a hydro-blast bulldozer...oh yeah, and did I mention the vending machine? Most important of all, it's equipped with a giant power crane and a reinforced titanium capture cage that are the only things around that can contain Eruptorr, the biggest and meanest lava monster of them all! At least, I sure hope they can contain him...

8189 MAGMA MECH

Our team scientist's pride and joy, the Magma Mech is a state-of-the-art suit of powered robotic armor that's loaded with upgrades to enhance the pilot's strength and speed. Between its spinning water jet and its ultra-extendable grabbing claw arm, it's built to tackle any job from clearing cave-ins to capturing pesky monsters.
